SUMMARY

Artificial Intelligence and Data Science undergraduate with hands-on experience building end-to-end ML and AI systems, including RAG-powered learning tools and AI agent-based, workflow-driven systems. Strong in Python, SQL, EDA, and model evaluation, with experience translating raw data into measurable insights. Skilled in Generative AI concepts and LLM integration, with a focus on applying machine learning techniques to solve real-world problems through practical.

EDUCATION

B.Tech Artificial Intelligence and Data Science	2023 – 2027
Sri Shakthi Institute of Engineering and Technology CGPA: 8.65/10 *	Coimbatore, Tamil Nadu
HSC	2022 – 2023
SRI KGS Hr. Sec. School Percentage: 86.6% *	Tanjore, Tamil Nadu

PROJECTS

MicroAnchor AI | Python, RAG, LLMs, Embeddings, Vector Databases Jan 2026
Built MicroAnchor AI, an AI-assisted learning verification system to measure long-term retention beyond one-time study. Designed a RAG pipeline ingesting 20+ PDFs and video transcripts to generate 100+ concept-aware recall questions using the 1–4–7 spaced recall rule. Implemented LLM-based answer evaluation to assess recall accuracy and conceptual clarity, enabling detection of misconceptions across multiple review cycles.

NexaAgents | Python, AutoML, LangChain, Streamlit Oct 2025- Dec 2025
NexaAgents is an autonomous multi-agent system designed for complete end-to-end data analysis and automated machine-learning. Each AI agent specializes in tasks like data cleaning, EDA, visualization, model selection, and report generation. With integrated AutoML, the system automatically compares algorithms, tunes hyperparameters, and selects the best-performing model—making data analysis fully hands-free, scalable, and consistent for any dataset.

EXPERIENCE

Career Ladder - AWS Internship ↗	April 2025 - May 2025
Atoms Systems Pvt Ltd - Data Science Internship ↗	Jun 2025 - Jul 2025

TECHNICAL SKILLS

Programming & Data : Python, SQL with hands-on experience in data analysis, visualization.
AI & Machine Learning : Applied ML, deep learning fundamentals Generative AI (RAG, AI agents) using LangChain and LangGraph.
Automation & Workflow: API integrations, and version control using Git and GitHub.
